Faculty Position Atomic, Molecular and Optical Physics

The Columbia University Department of Physics seeks to appoint an assistant professor performing experimental research in atomic, molecular and optical physics or a related field. It is expected that the candidate will develop a vigorous independent research program, continuing the long Columbia record of outstanding accomplishment in science. Applicants for this position must possess a doctoral degree in Physics or a related field, have demonstrated the potential to do pioneering experimental research and the promise of excellence in teaching and mentoring at both the undergraduate and graduate levels.

Applications must be submitted online and must include a cover letter, Curriculum Vitae (including publication list), a brief statement of research plans, a brief statement of teaching philosophy and a list of references. Applicants also should arrange for three letters of recommendation to be sent on their behalf via the online system. Please visit our online application site for further information about this position and to submit your application.

Review of applications will begin November 1, 2014 and continue until the position is filled. Columbia University is an Equal Opportunity/ Affirmative Action employer. Columbia is committed to a working and learning environment supportive of its faculty and staff in their pursuit of meaningful and productive academic, personal and work lives.
